FASTENERS**

**EXTERIOR**

**STRUCTURAL**

**AXIS™**

**Horizon Curve™**

A slight curvature of the head for elegant, professional, architectural results. The Finish Ring underneath the head also provides a better finish by cutting the top fibers in the wood for an extra step in countersinking.

**Turbine Ribs™**

(patent pending) Turbine Ribs cut quickly into the wood, leaving a professional, clean finish with maximum wood contact. The cup shaped, countersinking head provides increased holding power and reduced risk of splitting.

**Twin Blades™**

(patent pending) This set of knurls cuts fast to dramatically reduce friction and heat on the shank, while reducing load on the drill. They also provide better performance by removing debris faster than a standard fastener's knurl.

**Fast Start Tip**

With sharp threads all the way to the tip, the fastener has an immediate grip for a fast start. The inset thread cut drastically reduces the splitting effect and minimizes the driving torque needed to engage the wood.

This advanced, General Purpose Structural Wood Screw with ZYTEC™ XT corrosion protection coating is for typical high-corrosive exterior and interior environments. Use them on any size job or project from framing to small wood working!

Available in 1lb, 5lb and 1/4 Keg  
All Packaging Includes Drive Bit!

THE ULTIMATE FASTENERS

EXTERIOR

STRUCTURAL

The AXIS™ Structural Wood Screw is the next step in fastener design. Every facet has been evaluated and improved (patents pending). Our extra sharp Fast Start Tip saves you time onsite and the Twin Blades outperform the competitor's knurls. The Turbine Ribbs ensure an incredibly clean finish. Its cup shaped, countersinking head, provides unparalleled holding power and less risk of splitting the wood. The Horizon Curve Head has been architecturally engineered to leave an elegant finish.

TYPICAL EXTERIOR USE

ZYTEC™ XT Coating: For general outdoor use. Compatible with most above ground pressure treated lumber. For ground contact treated lumber, areas within one mile of saltwater, near swimming pools, exposure to corrosive chemicals, or other areas where corrosion is more like to occur, use proper grade Stainless Steel. Always follow timber manufacturer's recommendations for fasteners.

Common Applications

- Commercial & residential
• General indoor and outdoor jobs
• Decking, railing and fencing
• Roofing and siding
• Construction, remodeling and repair
• Framing, windows and doors
• Trim & Cabinetry
• And much more!

Sizes Available: #8 x 3/4" to #14 x 8"

Table with columns for General Info, Construction (#8, #9, #10, #14), Product Range (Length, Thread), and Approx Count per 11lb.
